Shivam Bhardwaj

Full Stack Developer

+91-9315819414 | shivambhardwaj9910@gmail.com | LinkedIn | github.com/shivam-bhardwaj9

Summary

Full-stack developer with around a year of hands-on experience (internship, freelance, and open-source) across Next.js, React.js, Node.js/Express, and MongoDB, shipping features end-to-end from database to UI. Comfortable owning day-to-day changes, bug fixes, and production deployments independently. Practical experience integrating AI/LLM-powered features (RAG, vector databases) into applications, with early hands-on exposure to React Native and Expo for mobile.

Technical Skills

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design
Mobile: React Native, Expo (early hands-on exposure)
Backend: Node.js, Express.js, REST APIs, FastAPI, Systems Design Fundamentals
Databases: MongoDB (schema design, queries), PostgreSQL, MySQL
AI / Automation: LLM & AI API Integration, Retrieval-Augmented Generation (RAG), Vector Databases (ChromaDB)
Tools & Practices: Git, GitHub, Postman, Docker, AWS Basics, Production Deployment, Code Review, Open-Source Collaboration

Experience

Frontend Developer Intern **Nov 2025 – Jan 2026**
Vertex Development (Remote) *India*

- Built and shipped responsive, reusable UI components using React.js, Tailwind CSS, and HTML5/CSS3 within an existing production codebase.
- Integrated REST APIs end-to-end, handling request/response design, input validation, and error states.
- Collaborated with developers and designers in an agile workflow, breaking work into well-scoped tasks and incorporating code review feedback.

Open Source Contributor **2026**
GirlScript Summer of Code (GSSoC) *Remote*

- Contributed to open-source projects by submitting pull requests reviewed and merged by project maintainers, working within existing codebases and conventions.

Projects

Committee Manager (Chit Fund Tracker) | React.js, Node.js/Express, PostgreSQL **2026**
- Built a full-stack application end-to-end for tracking rotating savings committee members and monthly payments, designing the schema and payment-tracking logic.
- Deployed across a multi-service stack: backend on Render, frontend on Firebase, and database on Neon (PostgreSQL) – hands-on experience with production environment configuration and rollouts.

AI Based Social Media Post Generator | React.js, APIs, Tailwind CSS **2025**
- Integrated third-party AI/LLM APIs to generate content from user prompts, handling request formatting, prompt structuring, and response parsing.
- Built reusable frontend components optimized for mobile and desktop responsiveness.

Real-Time Location Sharing App | React.js, Node.js, Socket.io **2025**
- Designed WebSocket-based communication for low-latency, real-time data synchronization between multiple concurrent users.
- Built modular frontend and backend modules, structuring the codebase for scalability and reuse.

React Native Mobile Experiments | React Native, Expo **2025 – 2026**
- Built early-stage mobile app screens with React Native and Expo, applying existing React/JS knowledge to mobile UI patterns as a growth area alongside web development.

Education

Bachelor of Computer Applications (BCA) **2023 – 2027**
Indira Gandhi National Open University *Delhi, India*
